

A-30 CONDOR

A-30 CONDOR

Designed for austere environments and high-endurance missions, our Light Tactical Aircraft delivers versatile performance for counter-insurgency, close air support, and armed reconnaissance.

With STOL capability, a 300 nm combat radius, 4-hour loiter time, and a 3,500 lb weapons payload, the Condor is built for sustained operations in remote regions. Emphasizing modularity, field maintainability, and low operational cost, the A-30 offers a globally competitive solution tailored to emerging defense markets.

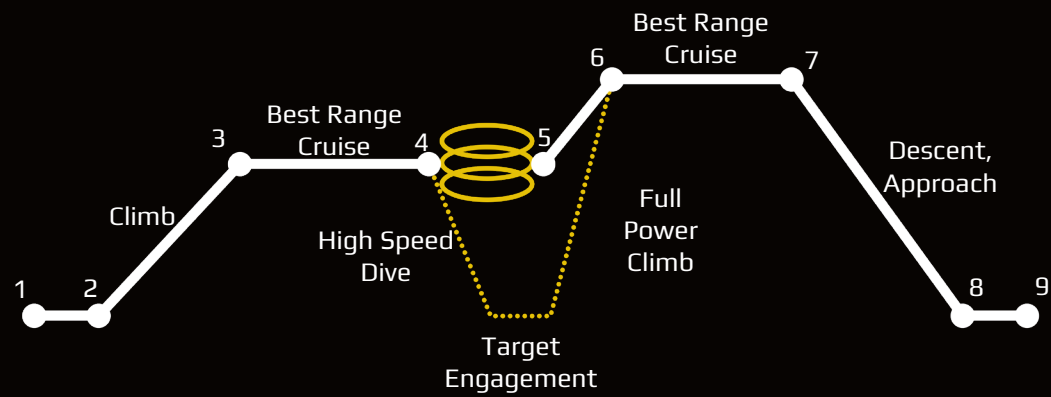

STRIKE MISSION

LOITER

The A-30 combines long-range strike and surveillance capabilities along with full trainer functionality, offering multi-role versatility in a single, mission-ready platform.

Weapons configs

Mission Ready, Anywhere

The A-30 Condor is built for austere environments, with rugged landing gear and high-flotation tires for unprepared terrain. Its modular hardpoints and tough airframe support long missions in harsh conditions with minimal ground support—ideal for counterinsurgency, reconnaissance, and light attack roles.

Performance

Range/Endurance

Ferry Range (internal tanks)	1800 nm
Max Endurance	12 hr
Surveillance Mission	300 nm / 4 hr

Speed

Cruise Speed	280 KTAS
Max level speed	325 KTAS
Stall Speed	81 KTAS

Takeoff/Landing

Landing distance	2500 ft
Takeoff distance	2100 ft

Weights

Empty Weight	7500 lb
MTOW	14200 lb

Loads

Load Factor	+6G / -3G at MTOW
-------------	-------------------

PROPULSION SYSTEM

The PT6A-67F engine delivers proven performance and reliability for COIN missions. Built for tough environments and backed by Pratt & Whitney's global support, it ensures minimum downtime because during counter-insurgency operations, dependability isn't optional.

SURVIVABILITY

Built for survivability, the aircraft features flare dispensers to counter IR-guided threats, self-sealing fuel tanks to reduce fire risk after damage, and a zero-zero ejection seat for safe escape. Because protecting the crew is as critical as completing the mission.

COMMUNICATIONS

Equipped with VHF/UHF radios, secure voice encryption, and integrated IFF systems, this aircraft ensures reliable, clear communications and precise identification—keeping crews connected and mission-ready in any environment.

EO/IR TARGETING

The STAR SAFIRE 380-HLD delivers unmatched EO/IR imaging with advanced tracking and integrated laser designation for precision targeting. Field-proven and rugged, it provides clear, actionable intelligence when on station—ensuring mission success with every sortie.

COCKPIT INTEGRATION

Designed for pilot effectiveness, the aircraft features a modern HUD, HOTAS controls, and a pressurized, air-conditioned cockpit—delivering comfort, control, and clarity. It's a workspace built for long missions and split-second decisions.

MAINTAINABILITY

Designed for operational uptime, the aircraft features easy-access panels, modular components, and built-in diagnostics. These enhancements reduce maintenance hours and support rapid turnarounds—keeping mission ready status high and downtime low.

Operational Superiority: Condor's Advantage

Super Tucano

Condor

Time on Station [hr]	3:30	4:00
Armament Weight [lb]	1800	2600
Range [nm]	100	300
Operation Area [nm ²]	30,000	270,000
External Tanks?	YES	NO

Operational Radius from Edwards Airforce Base
